

YMC15 SERIES
15W

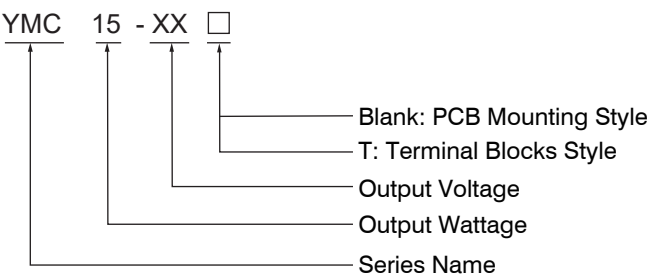

YMC15 is a 15W miniature (47.4*26.8*23.5mm) AC-DC module-type power supply, ready to be soldered onto the PCB boards of various kinds of electronic instruments or industrial automation equipments. This product allows the universal input voltage range of 85~305VAC.

Features

- Universal AC Input/ Full Range
- No load power consumption<0.12W
- Wide operating temperature range -40~85℃
- High efficiency up to 86%
- 4.74x2.68cm compact size
- Protections: Short circuit/Over load/Over voltage
- Operating attitude up to 5000 meters
- Three years warranty

Note	1. All parameters NOT specially mentioned are measured at 230VAC input, rated load and 25 ℃ of ambient temperature. 2. Ripple & noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1μF & 47μF parallel capacitor. 3. The ambient temperature derating of 3.5 ℃/1000m with fanless models and of 5 ℃/1000m with fan models for operating altitude higher than 2000m (6500ft). 4. The power supply is considered as an independent unit ,but the final equipment still need to re-confirm that the whole system complies with the EMC directives.For guidance on how to perform these EMC tests,please refer to "EMI testing of component power supplies". (as available on https://yingjiao.com/wp-content/uploads/2025/06/EMI_Testing_of_Component_Power_Supplies_Yingjiao.pdf) 5. If the product is not operated within the required load range the product performance cannot be guaranteed to comply with all parameters in the datasheet. 6.When the output terminal of the product needs to be connected to PE through a Y capacitor, or close to the metal frame, please refer to the Fig. 3 for recommended circuit. 7.Unless otherwise specified, EMC performance indicators are tested according to typical application circuits (Fig. 1).

Note: 1. With an AC input between 85-115VAC and a DC input between 100-165VDC, the output power must be derated as per temperature derating curves.
2. This product is suitable for applications using natural air cooling; for applications in closed environment please consult YINGJIAO.

Output Filter Components:

We recommend using an electrolytic capacitor with high frequency, and low ESR rating for C2 (refer to manufacture's datasheet). Choose a Capacitor voltage rating with at least 20% margin. C1 is a ceramic capacitor used for filtering high-frequency noise and TVS is a recommended suppressor diode to protect the application in case of a converter failure.
